Use template

Today

	Item	Person	Long text	Type	
<input type="checkbox"/>	This is my translation, I hope it works!			Questa è la mia traduzione, spero che funzioni!	Review
<input type="checkbox"/>	+ Add item				

Surmontez les **barrières linguistiques entre vos équipes** avec un système de traduction boosté par l'IA.

Améliorez votre rédaction par l'IA

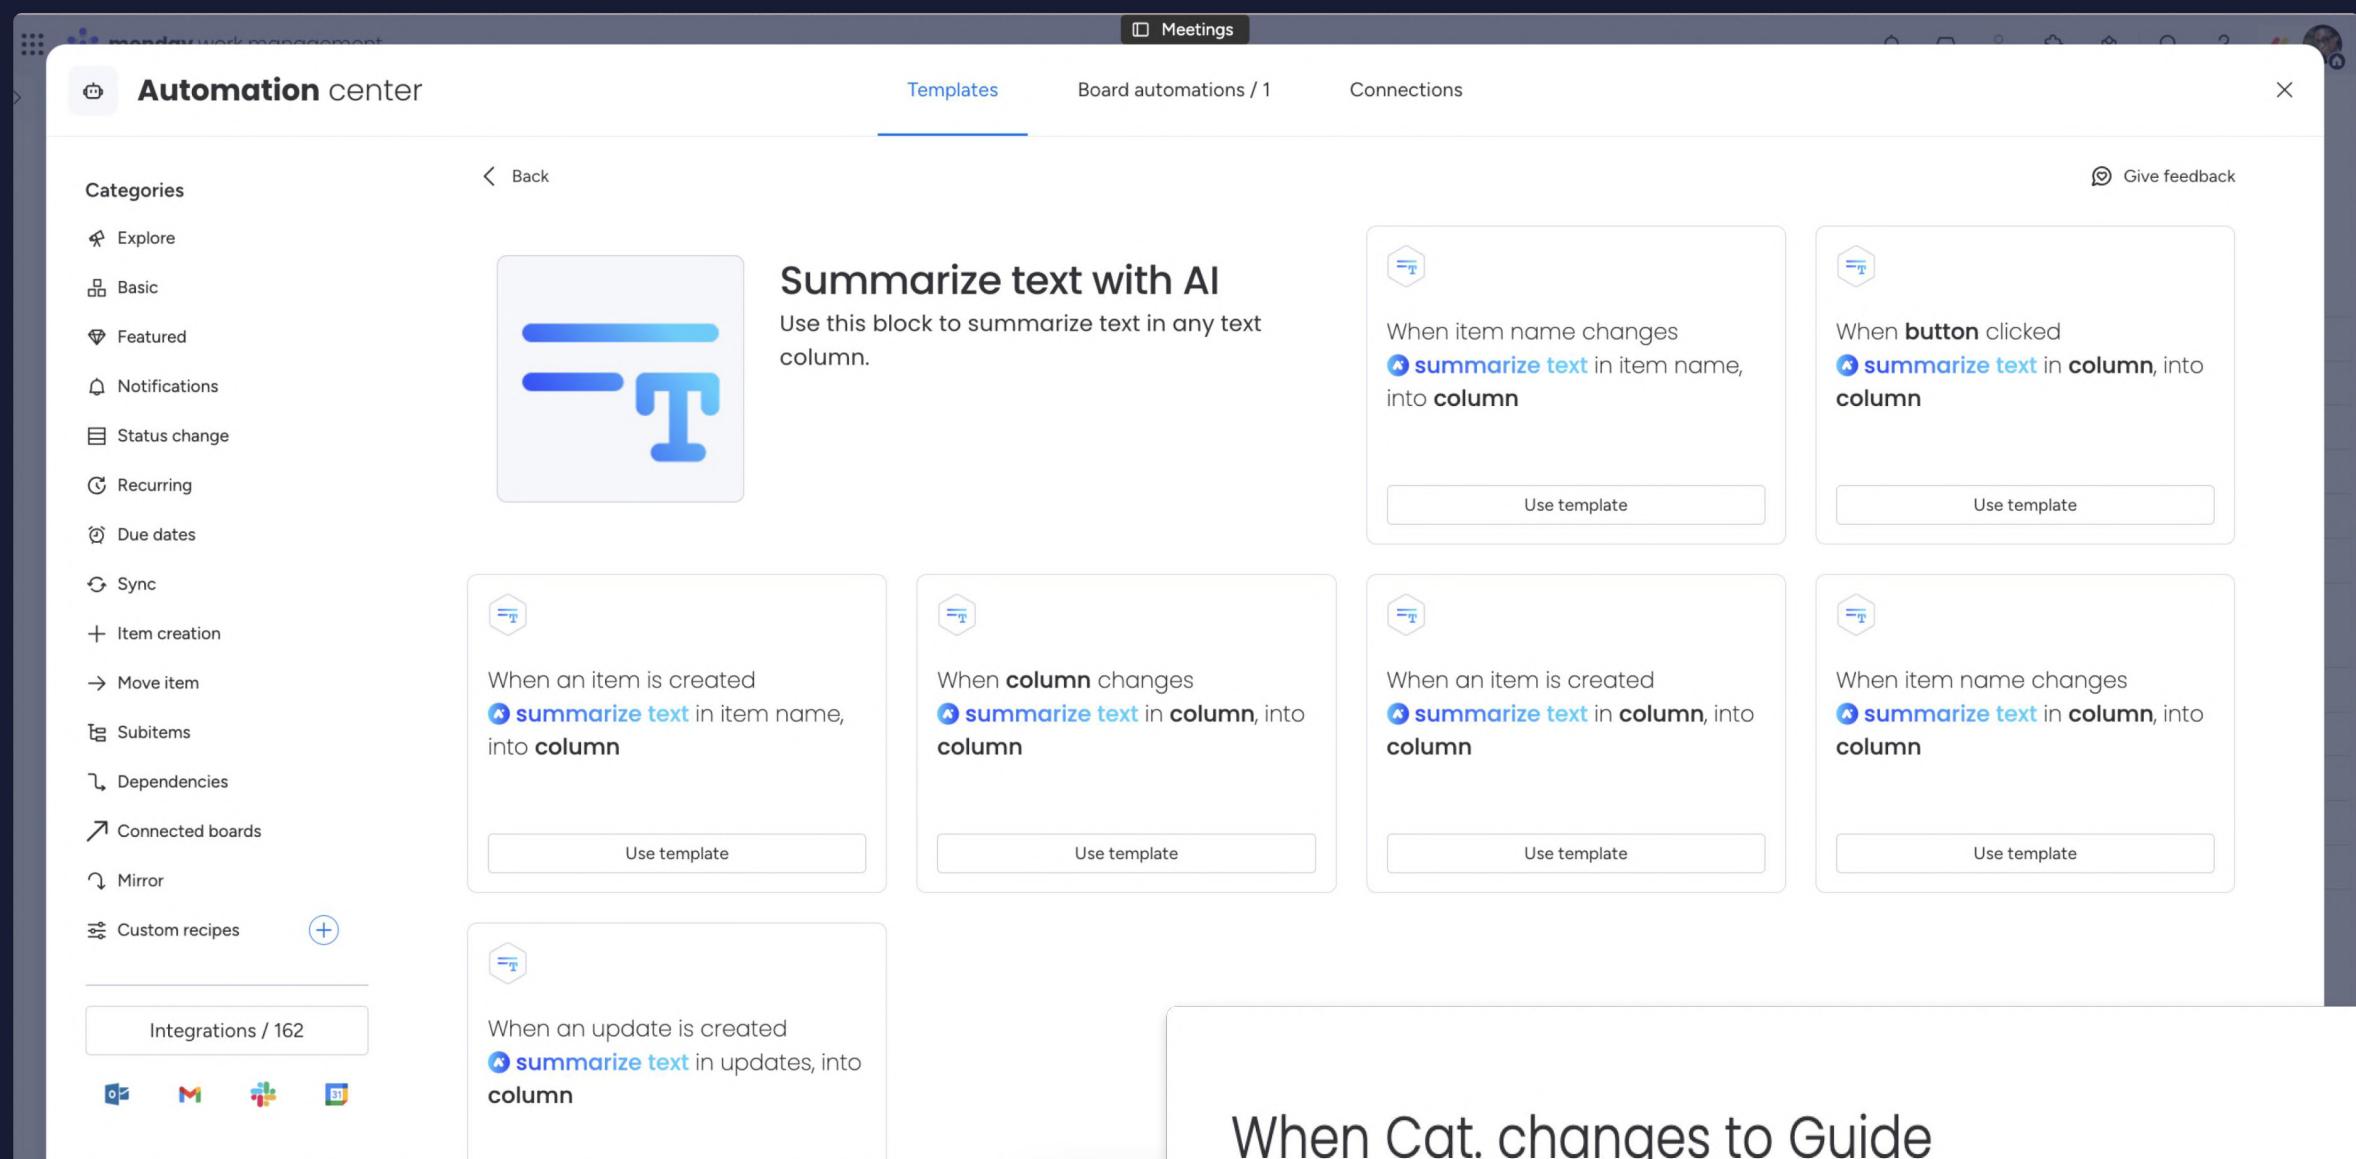

The screenshot shows the Trello Automation center interface. On the left, a sidebar lists categories like Explore, Basic, Featured, Notifications, Status change, Recurring, Due dates, Sync, Item creation, Move item, Subitems, Dependencies, Connected boards, Mirror, and Custom recipes. The main area is titled 'Automation center' and 'Templates'. It features a large card for 'Improve text with AI', which says: 'Use this block to refine text in any text column.' Below this are four smaller cards: 'When an item is created', 'When an item name changes', 'When column changes', and 'When item name changes'. Each card has a 'Use template' button.

Améliorez vos messages avec l'IA pour rendre vos textes plus clairs et professionnels.

Original text	Improved text
That's kinda cool, but I think it could be a lot better.	That's quite cool, but I believe it has the potential to be significantly better.

Résumez du texte par l'IA

The screenshot shows the Trello Automation center. The main focus is the "Summarize text with AI" template, which is described as "Use this block to summarize text in any text column." Below this, there are several other automation templates, each with a preview icon and a description:

- When item name changes **summarize text** in item name, into column
- When button clicked **summarize text** in column, into column
- When an item is created **summarize text** in item name, into column
- When column changes **summarize text** in column, into column
- When an item is created **summarize text** in column, into column
- When item name changes **summarize text** in column, into column
- When an update is created **summarize text** in updates, into column

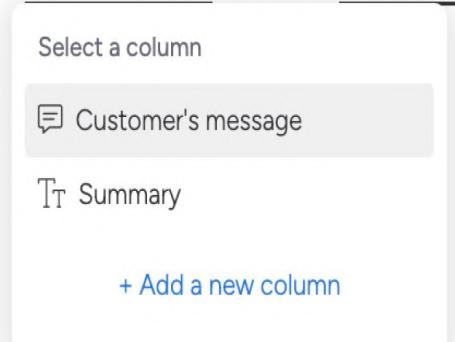

Résumez les **textes** en
extrayant les **points
clés** , pour faire **gagner
du temps à vos
équipes.**

When Cat. changes to Guide

Then **summarize text** in column, into Summary

Create automation

Catégorisez par l'IA

The screenshot shows the Trello Automation center with the 'Categorize with AI' template selected. The template card describes how to categorize text into a status column using existing labels. Below the card are four examples of how to use the block: 'When button clicked categorize column, into column', 'When an item is created categorize item name, into column', 'When column changes categorize column, into column', and 'When item name changes categorize item name, into column'. Each example has a 'Use template' button.

When an item is created

↓

Then categorize item name, into column

The screenshot shows the Trello search interface with the 'Categorize by AI' block highlighted. The search bar contains 'Search' and the results list includes: move item to group, change status, notify, gmail send email, create update, assign person, Categorize by AI text column (highlighted in blue), Categorize by AI item name, and Custom block by AI custom block.

When an item is created

↓

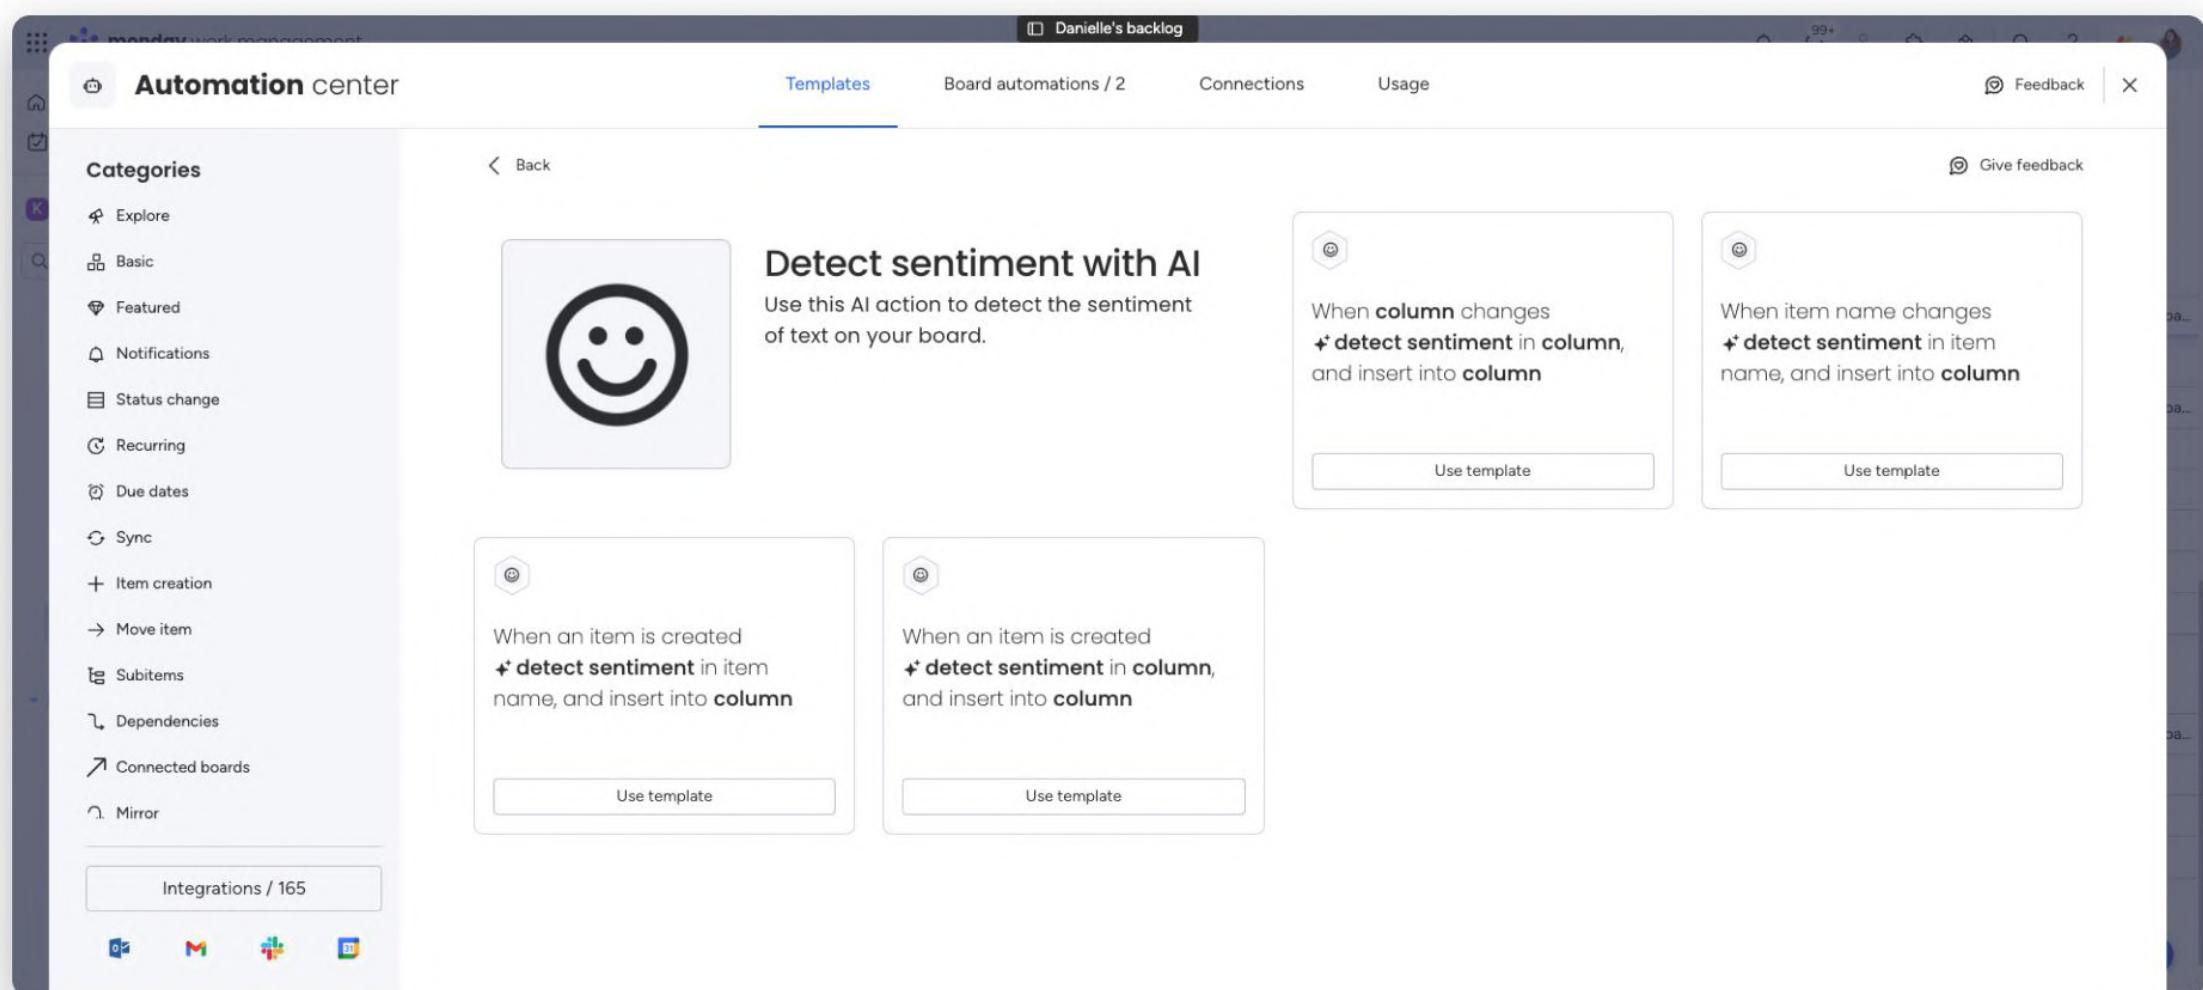

Then categorize column, into column

The screenshot shows the Trello search interface with the 'Categorize by AI' block highlighted. The search bar contains 'Search' and the results list includes: move item to group, change status, notify, gmail send email, create update, assign person, Categorize by AI text column (highlighted in blue), and Categorize by AI item name.

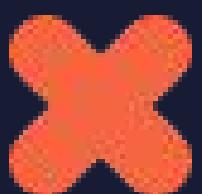

Analysez vos données avec l'IA et catégorisez-les par type, **urgence ou sentiment**, pour une gestion plus **intuitive et stratégique de vos priorités**.

Déetectez le sentiment avec l'IA

Utilisez l'IA pour analyser le **sentiment se dégageant des textes**, afin de prendre des décisions stratégiques et éclairées.
